The Core

Our business core value is to develop a sustain business relationship with our customers while achieving their needs within their constraint. It always been our pleasure to make you achieved your dreams by sourcing the materials you require.

Founder

Fadzli Abdul Halim is the founder of Hangtera. A dynamic and ambitious young man originally from the north Malaysia in the state of Kedah. His curiosity is always in engineering field since his young age and his business interest is the heritage from the family background.

His highest education is Bachelor Degree in Mechanical Engineering from Kolej Universiti Tun Hussein Onn (KUiTTHO) presently known as Universiti Teknologi Tun Hussein Onn (UTHM).

After completion of his study, he worked as mechanical engineer in the carton box manufacturing industry. He expands his knowledge and experiences while working as mechanical engineer.

He moved to Republic of Maldives in 2007 after get the chances to work in the resort hospitality industries as Assistant Chief Engineer. Begin the task to monitor the resort refurbishment project and to run the operation at the same time was a big learning curve for him.

Working outside of the country giving him the times to explore around the Asia region and by taking this chance he has observe the engineering practices from various places.
